Allpro Cloud Services

Sync your local **Allpro Insulator** SQL Database, and all of your agents in the field, seamlessly, and effortlessly. Your local computers in your network will connect directly to your **Allpro Insulator** SQL Database through your main office computer or server. The main computer or server in your office will connect to the **Allpro Cloud Services** through your office internet connection. Your agents at offsite locations, on the road, or at home offices will sync with your **Allpro Insulator** SQL Database through **Allpro Cloud Services** via the internet. With **Allpro Cloud Services**, you are not required to set up scheduled syncs, have all systems connected to the internet at a certain time of the day, or force your employees to exit the program during the syncing operation. With our highly customizable sync plans, you can choose the frequency at which your **Allpro Insulator** SQL Database will sync. **Allpro Cloud Services** also gives you peace of mind knowing that your data is being stored on secure dedicated servers, as well as having nightly backups being performed by **Allpro Technology** with our new **Allpro 365** back-up. Lets take a look at how **Allpro Cloud Services** works.

Your main office location contains your main **Allpro Insulator** SQL Database that all local network systems will operate from. This system will require an **Allpro Cloud Services** license. This main system will connect to the **Allpro Cloud** and handle all syncing with offsite and mobile databases. Computers that do not leave your office will connect directly to this database and will not require an **Allpro Cloud Services** license. When a sync is performed, all systems connecting to the main **Allpro Insulator** SQL Database will have access to all current and newly synced data. With Allpro Cloud Services your sync takes place every 15 minutes each and everyday.

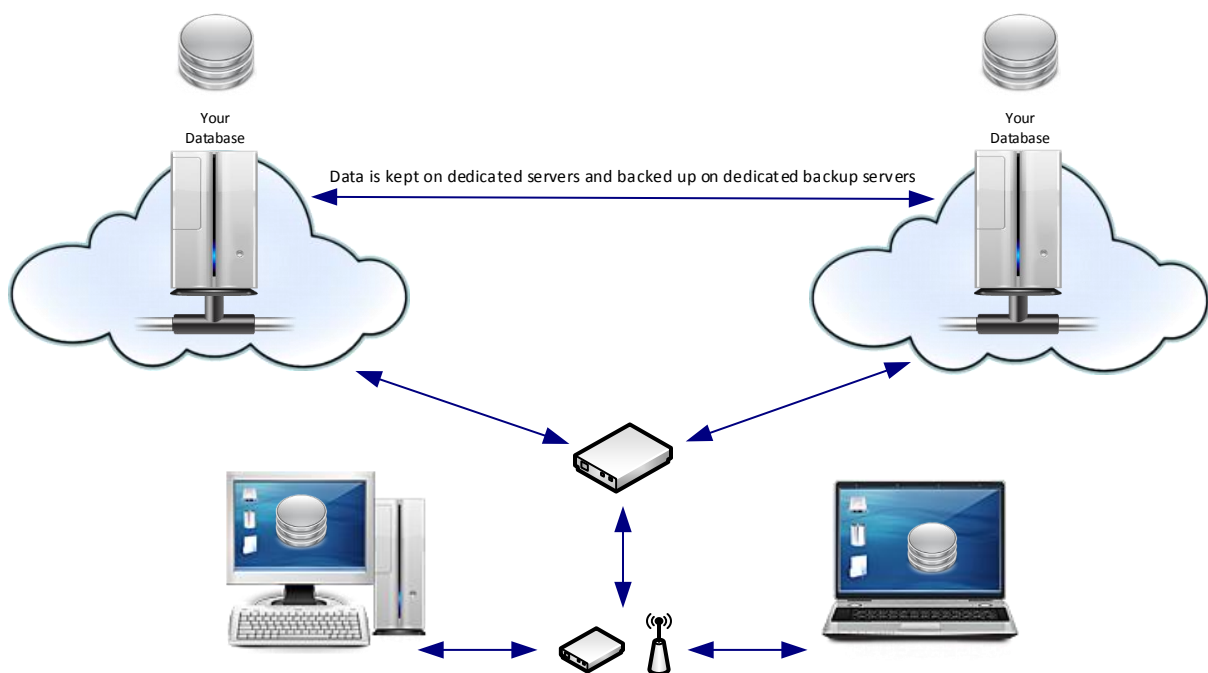

When your sales force is on the road or at the job site, they can use every aspect of **Allpro Insulator** as if they were at the office. With our continuing pledge, no internet connection is required to run **Allpro Insulator**. With the new **Allpro Cloud Services**, as soon as they have picked up a Internet connection via Hotspots, Office network, Mobile Broadband Card, etc., they will be connected to the **Allpro Cloud Services**. At this point their **Allpro Insulator** SQL Database will be synced with the **Allpro Cloud Services** database. The amount of time that is required to be connected to the internet connection is based on the internet connection and the sync takes about 1 minute to complete. The office and sales members will have all current and newly entered data from all locations on their **Allpro Insulator** SQL Database in this same 1 minute process. Note that all Offsite and mobile databases require an **Allpro Cloud Services** license.

Now that we have learned a little bit about how the new **Allpro Cloud Services** works, its time to talk about security. **Allpro Technology** is proud to announce that we will be hosting your **Allpro Insulator** SQL Database on **dedicated servers**. In terms of security and reliability, there is no better place to store your companies data. The dedicated servers are built on proven Windows Server and SQL Server technologies, and is flexible enough to cope with any variations in usage and load. The service replicates multiple redundant copies of your data to multiple physical servers to maintain data availability and business continuity. In the case of a hardware failure, the dedicated server provides automatic failover to optimize availability of your data.

With the use of Allpro Cloud Services, utilizing dedicated servers, your data is kept on multiple servers. With these redundant servers you are guaranteed faster reliable service. Not only do you experience faster sync times, but if one server is to go down for any reason, there is no interruption of service. Each of these servers syncs your data so that you are always working from an up to date database. With a 99.9% uptime guarantee, there is no need to worry about a lapse in service or a loss of data.

The purchase of Allpro Cloud Services is on a computer by computer basis, with prices starting at \$500, which includes the first 2 license. After that, each additional license of Allpro Cloud Services can be added for an \$150 each.

With this configuration, you are always guaranteed that your data is safe, secure, and accessible, but lets take it **One Step Further!**

Allpro Backup 365

We are also proud to introduce **Allpro Backup 365**. If you are a subscriber to our **Allpro Cloud Services**, you will automatically be enrolled in the **Allpro Backup 365** back-up plan. If you suffer catastrophic failure in house, or make harmful changes to your data, there is hope. **Allpro Backup 365** keeps up to an entire years worth of daily back-ups of your data stored on our secure, and climate controlled servers. This data can be restored back to working order upon request* to any previous date that has been backed up.

If you do not have Allpro Cloud Services you purchase Allpro Backup 365 separately for a low \$300 a year. Never risk data loss again!

If you have questions or are interested in the new **Allpro Cloud Services** (including **Allpro Backup 365**), feel free to contact us at anytime.

Note that Allpro Cloud Services is only compatible with Windows Vista or higher.
* Enrollment in Allpro Backup 365 is included in Allpro Cloud Services package, Data restoration charges may apply
